CO226
Database Project

Project Proposal

80% Course Participation

According to IESL accreditation,
we all need it
to complete
our degree program.

DO YOU HAVE

80 % attendance?
        or
doesn't?

Unless a student recorded his or her own attendance,

It is a very hard process
to calculate their own attendance by
themselves.

**They can only know it a week before
the end exam.**

What we need

or

What we can do ?

We need an

Online Database Management System
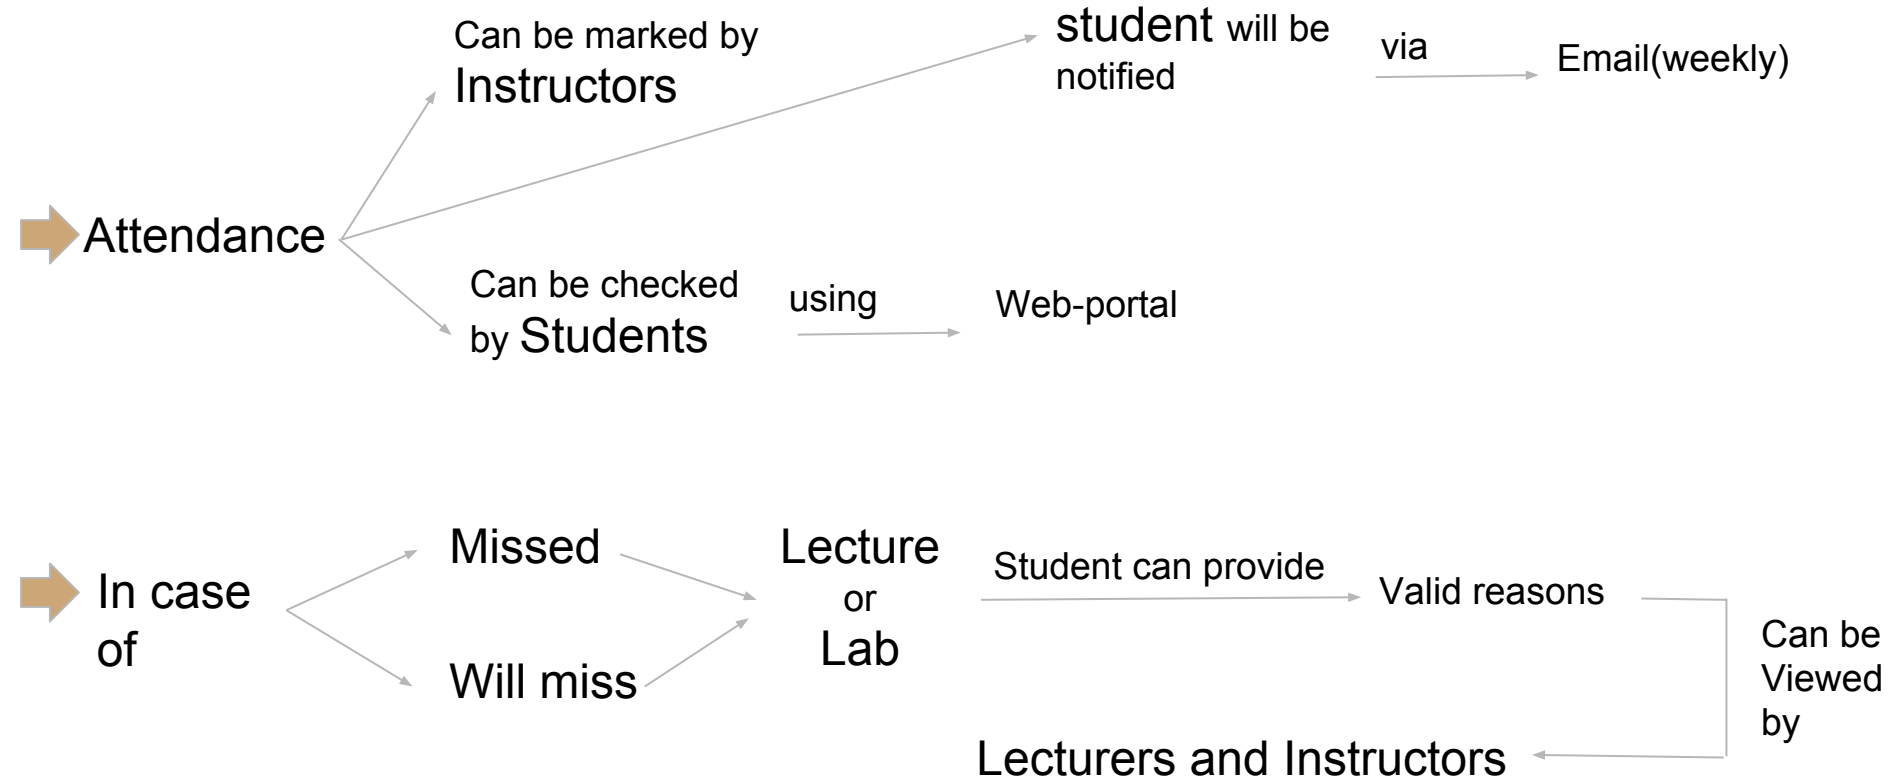

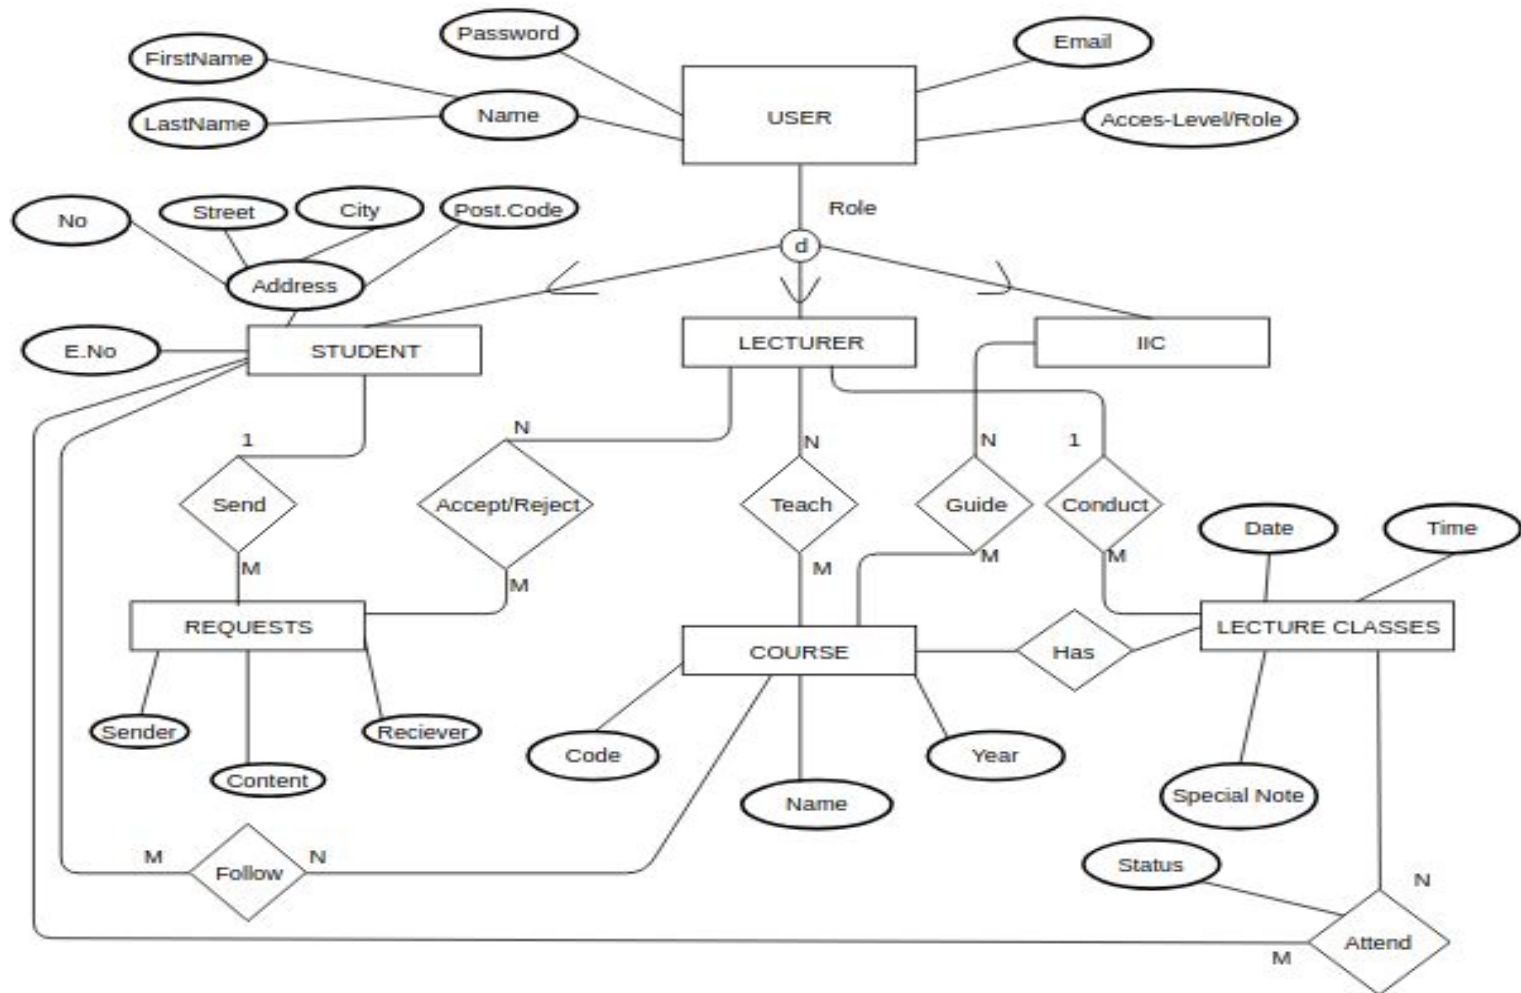

Is it only a database system ?

NO

**Next major problem related
to the attendance is,**

**"I will be missing/was missed a
lecture, and I have a fair reason."**

**But how do I inform it ?
to whom ?**

Our Solution

Attendance

Can be marked by **Instructors**

Can be checked by **Students** using Web-portal

student will be notified via Email(weekly)

In case of

Missed

Will miss

Lecture or **Lab**

Student can provide Valid reasons

Can be Viewed by

Lecturers and Instructors

EER-diagram

Future Developments

1. Recording Attendance using QR Code Scan or RFID Reader

2. Extending the DBMS to Departments, Faculties and to Universities.

Thank you
